

Part 4 Practice Question 1

Before we wrap up tonight's meeting, I'd like to announce that our chess club will have a special event next Tuesday at 7 P.M. The professional chess player, George Mason, will give a presentation based on some of his recent games. He will discuss tactics and strategies for different parts of the game. He will not be playing any games at that time, however. George is well respected in the chess community, and is also an entertaining speaker. The presentation will last approximately two hours and cost five dollars. We hope many of you will attend.
