

Sustainable Development Goals

Lesson 6

Goal 3 – Good Health and Well-being (2)

Read and Answer

- Every year more than 60 million Americans die due to heart disease.
- 69 million people died from AIDS-related illnesses in 2019.

***Have any diseases occurred in your country in recent years?
How did your country reverse the trend?***

Nowadays, the health of mother and child has become a growing concern. In 2016, 2.6 million **newborns** died in the first month of life. They didn't have quality care and skilled treatment. What's more, **poor nutrition** causes 45 % of the child deaths under 5 years old.

Disease is also one of the factors that affect people's health. AIDS is now the leading cause of death among teenagers (aged 10–19) in Africa.

People in some countries do not have access to proper medical help. They don't have enough medical supplies and even health care workers, which also causes many health risks.

newborns

babies from birth to
four weeks

poor nutrition

Less source of
materials to
nourish the body

Fill in the blanks with the proper words.

- 1 Many newborns died in the first month of life because of the _____ and _____.
- 2 AIDS is a _____ diseases. We need do protections to prevent this epidemic.
- 3 People in poor countries do not have _____ to proper medical help.

Focus on Global Issues

QQ English

Read about the health problems in the world.

In Nigeria

In Nigeria, Africa, about 150,000 babies and children are infected with AIDS due to lack of disease prevention.

In Sierra Leone

In Sierra Leone, west Africa, almost 1 in 8 pregnant women died in the process of giving birth because of poor medical conditions.

Focus on Global Issues

QQ English

Read about the health problems in the world.

In Brazil

Children from northeastern regions of Brazil suffered from diseases because their families were too poor to supply their daily nutrition in time.

In the Philippines

According to the Philippine Medical Association (PMA), 17 doctors died of COVID-19 due to lack of medical protective equipment.

Focus on Global Issues

QQ English

Think and list some health problems in your country.

Your country:

1. Death rate of children and women:

2. Poor medical services in some regions:

3. Poor nutrition among the elderly and children:

4. Infectious diseases:

What can we do to improve health problems?

Talk about some possible ways to improve health issues from national and individual perspectives.

Your opinions:

For countries:

The government should speed up the development of vaccines to ensure that most people have regular vaccinations...

For individuals:
