Sustainable Cities

A “sustainable city” is a city that focuses on environmentally friendly practices. It aims to improve the urban **surroundings** and benefit the well-being of citizens living there.

Recently, air pollution is very serious in many cities due to **vehicle exhaust**. Under this air condition, citizens are highly likely to suffer from all kind of diseases.

In addition, the improper disposal of **garbage** will also bring a burden to urban life. Therefore, many **communities** have begun to adopt strict garbage sorting rules to protect community environment. people who produce household waste should be responsible for garbage sorting.

vehicle exhaust

the spread of diseases

improper disposal of garbage

Reading

QQ English

To build a green city, the community must first take measures to protect the surroundings that citizens live. The community should encourage the building of green homes, reserve more green space, support environment-friendly transportation methods, and offer efficient recycling and waste management.

Meanwhile, all the citizens should work together to improve community environment. We should positively obey garbage sorting rules and choose environment-friendly public transportation in our daily life.

Respond to Reading

Compare the development of the two cities, which one is more like a “Sustainable City”? Why do you think so?

Read the Sustainable Development Goals from United Nations.

Sustainable Development Goals

Goal 11 – Sustainable Cities and Communities

1. By 2030, ensure access for all to adequate, safe and affordable housing and basic services.

2. Support positive economic, social and environmental links between urban and rural areas by strengthening regional development planning.

Deeper thinking after class:

To establish a sustainable city, what the specific methods or policies should the government or the individuals do?

Task : Do research and collect the data about sustainable cities of your own country in your preview paper.
