

Sustainable Development Goals

Lesson 24

Goal 12

Responsible Consumption And Production (2)

Read and Answer

35.4 million

In 2017, plastics generation was 35.4 million tons in the United States.

70 %

According to National Geographic, 73% of all beach litter is plastic.

12 minutes

The average time that a plastic bag is used for is only 12 minutes.

? What will happen if people overuse plastics?

Over the past 50 years, global **production** and **consumption** of plastics have increased more than 20 times over, because the use of plastic is very **economical** and **convenient**.

Although useful, plastic is harmful to the environment. To deal with this problem, many countries have taken actions to ban the use of plastics.

Besides, a lot of countries have begun to implement **waste recycling** policies such as Japan and Korea.

Waste Recycling

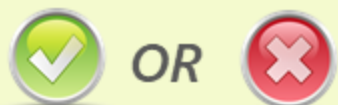

is processing used materials (waste) into new, useful products.
