## Ⓢ TEST TECHNIQUE

### ● Do's

Read the question quickly before it is being read, and map out your strategy.

Some questions may have two parts to them. Make sure you answer both questions.

To answer opinion questions, your opinion should be supported logically by some reasons.

### ● Don'ts

Don't give one word answers.

Don't repeat the same simple sentence.

Don't finish your answer with a lot of time to spare.

### Score Response Description

Scores are assigned based on the criteria in the chart below.

3: The response is a full, relevant, socially appropriate reply to the question and the speaker responds fluently so that the listener has little difficulty in understanding. The choice of vocabulary is precise and appropriate for the questions and the speaker's use of grammar and structures fulfills the demands of the task.

2: The response is a partially effective reply to the question, but is not complete, fully appropriate. The answers may sometimes be slightly hard to understand because of pronunciation faults. The choice of vocabulary may be limited or somewhat inexact, although overall meaning is clear. The use of grammar and structures may require some listener effort for interpretation.

1: The response does not answer the question effectively. Relevant information is not conveyed successfully. Pronunciation faults hinder the listener's understanding. The choice of vocabulary is inaccurate and inappropriate. The speaker may merely repeat the questions that are presented to him or her and nothing else. The use of grammar and structures may interfere with comprehensibility.

0: No response OR no English in the response is given, OR the response is completely irrelevant to the task.
